

Exercise: DMN Modeling

In this version of the Kringler booking process there is an additional task for calculation the price. This task is a decision task.

The price is calculated based on the data given in the meeting request form:

Meeting Request

Type of Room

Meeting Room

Conference Room

Number of People

Your answer

Decision criteria for the price are:

- The price for a meeting room is 500
- If the requested room is a conference room and the number of people is less than or equal to 30, then the price is 800
- If the requested room is a conference room and the number of people is greater than 30, then the price is 1200

Exercise

Model the decision in DMN.
