

Admission to the MSc Business Information Systems

Types of Knowledge

This is a description of the admission to the Master of Science in Business Information Systems at FHNW University Applied Sciences and Arts Northwestern Switzerland:

First the study assistant prepares the eligibility check of the candidate, then the head of program decides, whether the candidate is eligible.

A candidate is eligible if he/she has a bachelor degree in Information Systems with good grade from a recognized university. The degrees in Computer Science and Business Administration are equivalent to Information Systems.

A university with rank H+ is recognized, a university with rank H- is not recognized. A university with rank H+/- probably is not recognized; for these universities additional clarifications are made.

Task:

Which knowledge is used in the process?

Classify the knowledge according to the following dimensions:

- Declarative vs. procedural
- Reliability: precise, uncertain, incomplete, vague
- Type: Facts/Instances, Rules/Concepts
