

Business Process Digitalization and Cloud Computing

Exam

Andrea Morichetta, Phd

Computer Science Division

January 16, 2019

Goal of the project

- Provide a **collaboration model** solving a real case study implemented in Camunda.
- Any **activity** of the collaboration model should be **automatically saved** inside the blockchain.
- For each **activity** of each instance a new ethereum **transaction** should be recorded

Groups size: maximum 2 people

Steps to do

- Write one page containing the **proposal** (BPMN model and short description)
- Wait the **consensus** to start from the teacher
- Provide your **artefact with a small report** (around 10 pages) three days before the exam date
- **Present the artefact** in front of the teacher and answer three questions concerning the theory part.

Case Study Example
